Forecast for Thursday 19 Sep 2024

Weather: A chilly start to the day, with a few mist and fog patches in prone valleys. However, these should be short-lived and clear quickly after sunrise, any low cloud quickly dissipating to give a warm and sunny afternoon. Dry with clear skies after dusk.

Chance of cloud-free hill tops above 800m: Generally greater than 95%.

Low Cloud and visibility: Mediocre in any mist and fog patches at first, these quickly dissipating during the morning to give excellent visibility by midday, with uninterrupted panoramic views.

Valley	18/15	18/16	20/18	20/18	17/16	16/15	15/14
Freezing Level*	2300m	2400m	2300m	2300m	2300m	2300m	2200m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Wind surprisingly strong at height, especially over peaks and east facing ridges. Extra layer recommended.

Forecast for Friday 20 Sep 2024

Weather: Cloudy at first, with extensive low cloud and the odd outbreak of drizzle in the east overnight, dry in the west. The cloud is expected to lift and break during the morning, followed by decent spells of sunshine in the afternoon. It'll be very windy though, with a chance of gales over peaks and ridges.

Maximum wind: East to north-easterly 30-35mph with gusts up to 40-45mph.

Chance of cloud-free hill tops above 800m: 10-20% at first but becoming greater than 95% in the afternoon.

Low Cloud and visibility: Generally poor around daw under extensive low cloud, with bases as low as 250-300m on east facing upslopes. Less chance of mist and fog. Cloud bases lifting above summits by about midday.

Temperature: **Valleys:** Plus 6 Celsius, becoming Plus 17 Celsius.
At 800m: Plus 7 Celsius, becoming Plus 13 Celsius.
Freezing level: Above summits.
